PROFILE

Full Stack Developer focused on designing and evolving web applications across the frontend and backend layers. Experienced with **TypeScript, Angular, Node.js and NestJS**, REST APIs, service-oriented architectures and relational databases. Hands-on experience modernizing legacy applications, migrating Firebase-based solutions to custom backend architectures, integrating external services and supporting cloud deployments. Currently contributing to institutional software projects at Universidad Tecnológica de Pereira using **Scrum, GitLab and collaborative software-development practices**.

PROFESSIONAL EXPERIENCE

Prestémonos

Full Stack Developer

Dec 2023 – Present
Dosquebradas, Colombia

- Led the evolution of a Firebase-based architecture toward a custom **Node.js backend**, implementing authentication, authorization, REST APIs and external-service integrations; the new architecture reduced backend coupling by approximately **30%** and improved maintainability across **6 core modules**.
- Designed and deployed a **marketing automation microservice on Google Cloud Platform (GCP)**, automating customer-segmentation and campaign workflows and contributing to a **23% increase in requested credits**.
- Modernized legacy frontend applications by migrating **Angular 6** projects to modern Angular versions, reducing technical debt across **2 applications** and improving compatibility with current TypeScript and frontend tooling.
- Designed RESTful APIs with request validation, authentication and service-level integration, supporting **40+ endpoints** consumed by web applications and internal services.
- Developed reusable Angular/TypeScript components and responsive interfaces, reducing duplicated frontend implementation by approximately **25%** across recurring UI patterns.
- Managed application deployments and production incidents across cloud environments, maintaining approximately **99% service availability** and participating in code reviews and architectural decisions.
- Introduced automated processes and service integrations that reduced selected manual operational tasks by approximately **40%**.

Universidad Tecnológica de Pereira (UTP)

Backend Developer

Aug 2025 – Present
Pereira, Colombia

- Contributed to the development and maintenance of institutional backend systems using **NestJS, TypeScript and PostgreSQL**, delivering features through **Scrum** within a multidisciplinary software-development team.
- Participated in the backend development of the **UTP Mobile API**, supporting the mobile application's services and integrations; the application has surpassed **10,000 downloads** on Google Play and is also distributed through the App Store.
- Designed and implemented reusable REST APIs and decoupled service modules consumed by multiple institutional applications, establishing a foundation for progressive migration toward **microservice-oriented architectures**.
- Developed and maintained database integrations with **PostgreSQL and Oracle**, implementing data access, business rules and service integrations for **30+ institutional modules**.
- Contributed to the modernization of legacy systems and delivery of **20+ features/releases**, participating in code reviews, technical documentation and GitLab-based merge-request workflows.
- Applied Scrum ceremonies, incremental delivery and continuous collaboration to improve development flow, contributing to an estimated **20% reduction in delivery cycle time**.

TECHNICAL SKILLS

Frontend: TypeScript, Angular, React, HTML5, CSS3, SASS, Tailwind CSS

Databases: PostgreSQL, Oracle, MongoDB, MySQL, Prisma

Architecture: Service-oriented architecture, API integration, modular design, legacy modernization

Backend: Node.js, NestJS, REST APIs, JWT, Microservices

Cloud / DevOps: GCP, Firebase, Docker, Git, GitLab, CI/CD, Terraform

Engineering: Scrum, code review, technical documentation, testing, version control

EDUCATION

Universidad Tecnológica de Pereira
Ingeniería de Sistemas y Computación

2023 – Present
Pereira, Colombia

LANGUAGES

Spanish: Native

English: B2 — Upper-Intermediate
